

USER GUIDE FOR “YELLOW BOX” DATA ON THE NAVAL RESERVIST IN MEDRUPMIS

CCQAS INFORMATION: <http://nhso-jax.med.navy.mil/ccpd/>

Reference: BUMEDINST 6320.66C

FIELD #2:

Licenses: All licenses held by the practitioner/professional issued by State or District of Columbia

FIELD #3:

License Expirations: Dates when the licensed independent practitioner's or clinical support professional's licenses expire

FIELD #4:

Privileges: Core* privileges held by the licensed independent practitioner
Licensed independent practitioners include: Medical Corps officers, Dental Corps officers
Medical Service Corps officers (Allied Health Professionals), and Nurse Corps officers who are
Advance Nurse Practitioners (Family Nurse Practitioners, Pediatric Nurse Practitioners, Women's
Health Practitioners, Nurse Midwives and Certified Registered Nurse Anesthetists)

*** CCPD, Naval Healthcare Support Office, Jacksonville can only grant core privileges;
supplemental privileges are granted at the Medical or Dental Treatment facility (MTF/DTF)
and the licensed independent practitioner must request them at the facility**

Privilege categories:

R = Regular with current core privileges

N = Not privileged:

Can be one of the following:

- 1) A licensed independent practitioner who has not been granted core privileges as yet (not good to go);
- 2) Supplemental privileges or a subspecialty that can only be granted by the MTF or DTF;
- 3) **N** is also used in the privilege category field for clinical support staff nurses (i.e. Critical Care Nurses, Perioperative Nurses, Emergency Department Nurses, Staff Nurses) and dental hygienists (Dental Technicians with the NEC 8707) because they are not granted privileges. In this case **N** is ok and they would be considered “good to go” as long as all other criteria and requirements are satisfied (i.e. current license).

S* = Supervised with current core privileges (This is seen where someone applies for a new privilege and needs to establish competency) ***Is not seen/used in the CCPD CCQAS database**

T* = Temporary with current core privileges ***Is not seen/used in the CCPD CCQAS database**
(**R** and **N** are seen/used in the CCPD CCQAS database)

FIELD #5:

Privileges Expiration: Date that the licensed independent practitioners' privileges expire
Initial appointment for core privileges is for one year (first time appointment)
Reappointment for core privileges is for two years (thereafter, privileges are renewed every two years)

The **privileges expiration** is also the nomenclature used for clinical support staff nurses in CCQAS as identified above. Although clinical support staff nurses are not granted privileges, what this means for them is that every two years the clinical support staff nurses are reviewed to determine competency, license updates, certification updates and any new training or education.

FIELD #6:

Certifications:

Licensed independent practitioners' Specialty Board Certifications (i.e. Board certified Internal Medicine physician, Board certified Family Practice physician, Physician Assistant's certification – NCCPA – National Commission on the Certification of Physician Assistants; Nurse Anesthetist – CRNA – Certified Registered Nurse Anesthetist)

Clinical support staff nurses' certifications in a specialty (i.e. ANCC – American Nurses Credentialing Center)

Certifications generally have expiration dates; a few Board Certifications do not have expiration dates.

MEDICAL CORPS CORE PRIVILEGES:

Aerospace Medicine	Psychiatry
